

Reliable Weighing Easier Than Ever Before

The new Secura® is a laboratory balance that does far more than set new standards in metrological specifications. Beyond its technical specs, Secura® also gives you the security and serenity of knowing that you have done everything right according to best practices to ensure the quality of your measurement results, compliance with regulatory requirements and your efficiency as well.

First, the new operating concept of Secura® will noticeably ease your daily workload during weighing and, second, its APC function – Advanced Pharma Compliance – will relieve you from tedious and time-consuming documentation and monitoring tasks.

These two benefits, in combination with legendary Sartorius quality, make reliable weighing in regulated areas easier than ever before.

Always Correctly Levelled with Sartorius LevelControl

Secura® has an optoelectronic sensor that continuously checks to see if the balance is perfectly level. If it detects any out-of-tolerances, you will be immediately alerted to this pending risk and see specific guidance prompts to help you level the balance. Output of the weighing data over the interface port will be temporarily interrupted until the balance has been correctly levelled again.

This means you can rest assured knowing that only correct data is transmitted. During leveling, you will not have to change your seated position. More importantly, when working with toxic substances under a laboratory fume hood, you will not have to lean over the balance while leveling it. As a result, Secura® rules out the risk of health hazards.

Regulatory Compliance with Expert Support

Do you use your Secura® or other instruments in a regulated area and have to comply with a multitude of requirements, regulations and directives? Relax. Sartorius Lab Products & Services will provide you with the appropriate expert services specifically tailored to ensure compliance with the strict requirements of the pharmaceutical industry – and not just for balances.

Risk Minimization – IQ | OQ Documentation

Do you need qualification documents as proof of suitability to be able to use your Secura® in a regulated area? Sartorius Lab Products & Services will support you by providing trained specialists on site. We

will generate the documents you need according to risk-based test plans and test reports for installation and operational qualification.
