

Adventurer™ Pro

Analytical and Precision Balances

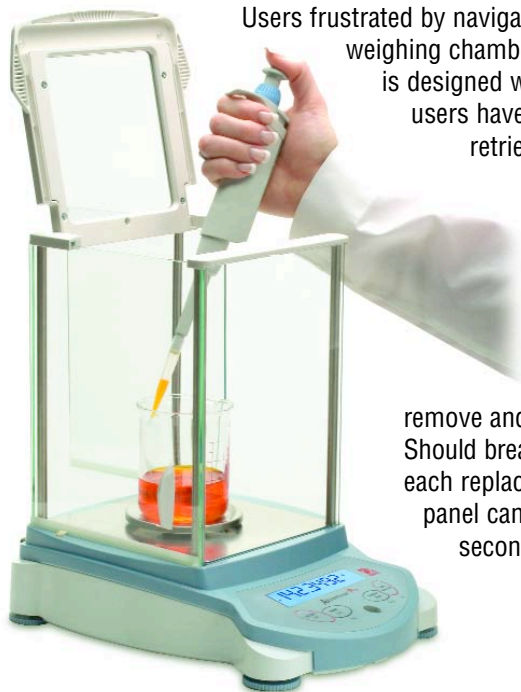

The Ohaus Adventurer™ Pro – The Most Complete Balance in Its Class!

Since its introduction, the Ohaus Adventurer™ Pro has established itself as the industry's most versatile balance. It counts, it sums, it holds and it delivers traceable results. Now, we're taking versatility to the next level by expanding the Adventurer Pro line to include a full range of Analytical and High Precision models. No other balance in its class offers all these features in a compact design:

- **Easy Access, Frameless Draftshield with Removable Doors** – All doors, including the front and back glass panels, disassemble in seconds, and together with a stainless steel bottom, make it fast and easy to clean.
- **SmarText™ Software Guides Users Through Balance Use** – SmarText™ is Ohaus' easy to use balance software that utilizes text prompts to guide users through application use and balance setup.
- **QuadraStance™ Design Provides Superior Footprint Stability** – To enhance weighing stability, QuadraStance incorporates four feet to provide superior footprint stability on any surface.
- **Flexibility of Available Options** – Ensure weighing accuracy with InCal™ internal calibration. A factory installed USB or second RS232 interface allows connection to multiple peripherals.

Adventurer™ Pro Balances

Frameless Draftshield With Removable Doors Provides Convenient Access

Users frustrated by navigating tight spaces will welcome the easy-access weighing chamber of the Adventurer Pro. The draftshield is designed without the need of top rails, so users have unobstructed entry to place or retrieve materials to be weighed.

With such unobstructed entry, the chance for accidental spillage is reduced helping to eliminate waste.

With contamination being a concern in today's work environment, all doors, including the front and back glass panels are simple to remove and replace for fast and easy cleaning. Should breakage occur, within 3 easy steps, each replacement door and panel can be installed in seconds.

SmarText™ Software Brings Man and Machine Together

SmarText™ is Ohaus' easy to use balance software that utilizes text prompts to guide users through application use and balance setup. Delivered through a 2-line backlit LCD and clearly marked buttons, SmarText tells you what is going on and what you have to do next.

Utilizing the 2-line LCD, SmarText simultaneously displays weight and application specific information such as percent or count. For example, with one touch of the Function button, SmarText will display application reference information such as average piece weight (APW), while displaying a parts count.

QuadraStance™ Design for Superior Stability

QuadraStance™ incorporates four adjusting feet to provide superior footprint stability on any surface. QuadraStance helps prevent rocking and tipping, enhancing the weighing stability of the balance, and keeping the Adventurer *Pro* level and accurate.

Additionally, Adventurer *Pro* has been designed with an up-front level indicator eliminating the need to look behind the balance during the leveling process. A quick glance at the up-front level indicator helps to ensure that the balance is level prior to each use.

Added Flexibility of Available Options

The Adventurer *Pro* also now offers InCal™ internal calibration. InCal ensures weighing accuracy by allowing you to calibrate the balance prior to use without the need of external weights.

All Adventurer *Pro* models come with a built-in RS-232 interface, and for added functionality can be equipped with either a second RS-232 or USB interface, allowing connections to multiple peripherals. With full GLP/GMP data output, Adventurer *Pro* can meet traceability and compliance requirements.

Other Standard Features Include:

Multiple Application Modes Including:

- Animal Weighing Mode – This mode allows the user to weigh small animals and filters out animal movements to provide a stable weight indication
- Parts Counting with Optimization – This mode allows the user to count based on a calculated piece weight. With optimization, counting accuracy is improved through auto re-calculation of the piece weight
- Percentage Mode – This mode allows the user to display the weight of a sample as a percentage of a reference weight
- Checkweighing Mode – This mode allows the user to check the weight of a sample against a preset target
- Totalization Mode – This mode allows the user to sum a series of sample weights
- Display Hold Mode – This mode allows the user to hold the highest stable weight on the display until cleared

Selectable Environmental Settings

- Three filter modes and adjustable zero tracking are ideal for working in slow filling applications where sensitivity is a must. When working in harsh environments, user can adjust balance settings to compensate for vibrations and other disturbances.

Protective In-Use Cover

The in-use cover is replaceable and offers protection against dust and debris, minimizing the chance of damage to the display and keypad buttons.

Adventurer™ Pro Balances

Feature Rich: Adventurer Pro Is The Most Complete Balance In Its Class

Security
To prevent unwarranted movement or theft, an integrated security bracket accommodates the accessory security device

Easy to Clean
Adventurer Pro's stainless steel platform and removable wind ring make it extremely easy to clean

Connectivity
Adventurer Pro comes with an included RS232 interface. A second RS232 or USB interface is also available as a factory installed option

Easy to View Display
Adventurer Pro features a 2-line alphanumeric LCD with brilliant backlight. Portable models include a backlight auto-off feature to conserve battery life

AC and / or Battery Power
Some models offer portability and can operate on either the included AC adapter, or on 4 "AA" batteries. An Auto Shutoff feature helps conserve battery life

Weigh-Below Hook
Adventurer Pro's integral weigh-below hook allows density determination or calculating the specific gravity of samples

Multiple Weighing Units
Adventurer Pro features multiple weighing units including a user-defined custom unit for use in unique weighing applications

Easy to Use Keypad
Four-button keypad with dedicated YES, NO, BACK and EXIT functions simplify menu navigation and balance set-up
